

Appln. No. 10/646,162
Amendment dated August 9, 2006
Reply to Office Action mailed March 15, 2006

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims (deleted text being struck through and added text being underlined):

1. through 5. (Cancelled)

6. (Currently Amended) A computer system ~~according to claim 5,~~
having an alternate activity indicator comprising:

an indictor configured to provide illumination and being visible from
a front panel of the computer system, the illumination of the indicator being
provided in response to the presence of a first continuous operating
condition;

an activity detection circuit coupled to the indicator, the activity
detection circuit being configured to generate an activity signal indicative
of the presence of a second periodic operating condition associated with a
component of the computer system, and to communicate the activity signal
to the indicator;

wherein the indicator is configured to be interrupted from illuminating
in response to the presence of the first continuous operating condition by
the activity signal to thereby produce an indication of the second periodic
operating condition comprising intervals when the indicator is interrupted
from illuminating in response to the presence of the first continuous
operating condition;

wherein the activity indicator includes a single color LED;

wherein the continuous indication by the activity indicator is
characterized by illumination of the activity indicator, and interruption of
the continuous indication of the activity indicator is characterized by
extinguishing the activity indicator;

wherein the first continuous operating condition includes a power-on
operating condition, and the second periodic operating condition includes a
hard disk drive operating condition; and

Appln. No. 10/646,162
Amendment dated August 9, 2006
Reply to Office Action mailed March 15, 2006

wherein the single color LED of the activity indicator is the only visible indication of the first continuous operating condition and the single color LED of the activity indicator is the only visible indicator of the second periodic operating condition.

7. through 16. (Cancelled)
